

Gardens:

The paradisiac gardens of the University Research Center. Wide, bright and peaceful place with a lush mixture of colours, sounds and smells

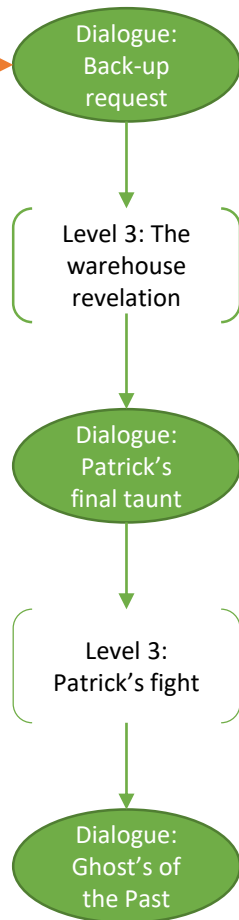

Industrial zone:

Bright, clean and highly organized area where the tranquillity of the gardens is disrupted by the bustling noises of automatons hurryingly moving and working.

Warehouse:

A darker and closed interior space filled with all kinds of stored good.

Tunnels:

Dark, humid and warm underground network of tunnels. Narrow and poorly ventilated with an oppressing silence
